Dyscalculia Services

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Training
Testing
Tutoring

DyscalculiaServices.com

Dr. Schreuder follows and implements the latest research about learning differences and best practices for intervention.

Dyscalculia Services does a complete evaluation for learning differences. The evaluation provides for a general mental development, screening for visual-spatial abilities, screening for reading level and dyslexia, screening for math level and dyscalculia, and gaps in particular mathematical areas. The information will cumulate in a detailed report and plan for intervention, taking into account the student's strengths and weaknesses,

A shorter Math and Dyscalculia assessment is also available when the issues are mainly manifesting in the area of Math.

Assessments, Training and Tutoring are available online and we work effective with adults and teenagers nation wide and international.

Dyscalculia Tutor Training

Math is our passion, awareness, communication, research
and remediation of dyscalculia is our mission

Dyscalculia Tutor Training

DyscalculiaTutorTraining.org

This is a comprehensive dyscalculia tutor training featuring 110 videos in 5 modules, about 35 hours of video instruction and demonstrations and 235 downloadable tools templates and games. After successful completion it will allow you to start or further your career as an independent Dyscalculia Tutor or Specialist.

Upon successful completion, you will receive Dr. Schreuder's certificate.

These are the modules:

[Dyscalculia Tutor Training Basic 1-1](#)

[Tutoring Dyscalculia, Fractions, Decimals and Percentages 1-2](#)

[Tutoring Dyscalculia, Algebra concepts in a visual way 1-3](#)

[Dyscalculia Tutoring Geometry Concepts 1-4](#)

[Tutoring Dyscalculia, Graphs, Charts and data analysis 1-5](#)

Dyscalculia for Dyslexia tutors

Math is our passion, awareness, communication, research
and remediation of dyscalculia is our mission

Dys4Dys.org

People with Dyslexia often also have the math learning disability or Dyscalculia. It works great if the tutor they already know and trust, can help them with both their Dyslexia and their Dyscalculia. Many tutors though have a specialization in Dyslexia and do not feel prepared to help their students with Dyscalculia. Dr Schreuder has recognized this issue and provides a Transition Training to help Dyslexia tutor get ready to also help their students with Dyscalculia.

You get introduced to new vocabulary, tools, manipulatives, templates and games. The training is flooded with video examples of interventions and the right way of using the manipulatives, enough to get started. Dr Schreuder is very committed to this training and always happy to answer any questions, should you get stuck with helping your student.

Master Arithmetic with Tools at Home

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

PracticalMathHelp.com

A video series that helps parents work with their children on their math problems or Dyscalculia. It splits out the various causes of trouble with math; early numeracy problem, memory, processing speed, visual spatial issues, math anxiety, and dyscalculia.

Dr Schreuder offers hand-on help for all these causes and then goes on in a vast number of demonstrations of the most popular tools and shows how to use them and what to use them for.

Finally, she discusses a number of programs available either in books or online that may help your child. The video series is a great toolbox to have and to use over and over with various problems you want to tackle.

Dyscalculia Awareness Training

Math is our passion, awareness, communication, research
and remediation of dyscalculia is our mission

Awareness Training On Site
Online

DyscalculiaAware.com

The Dyscalculia Awareness Training is a must for every teacher. Most teachers know the A, B, C of Dyslexia, we offer them the 1, 2, 3 of Dyscalculia.

Dr. Schreuder has developed a very effective awareness training that features the following topics:

- * Dyscalculia Explained
- * Developmental Dyscalculia and Number sense
- * Working Memory, Processing Speed, and Attention
- * How do we recognize Dyscalculia
- * How can we help people with Dyscalculia

Building on the success of her on site delivery of this training, we have recorded this to be able to share it nationwide and beyond.

Math in real life video series

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

MathInRealLife.org

A video series with over 35 videos by Dr Schreuder. She explains some basic math but mainly walks through real life situations and tells you exactly how your math can help you feel more confident making choices. Scroll down for what is in this video series and some free preview videos.

From adjusting a cooking recipe, through finding out how much paint you need for a wall and the cost of a roadtrip to getting a better handle on your 401(k) and pension and knowing how to evaluate all the statistics that the tv and social media push out daily.

No calculus or factoring polynomials but easy math in real life situation.

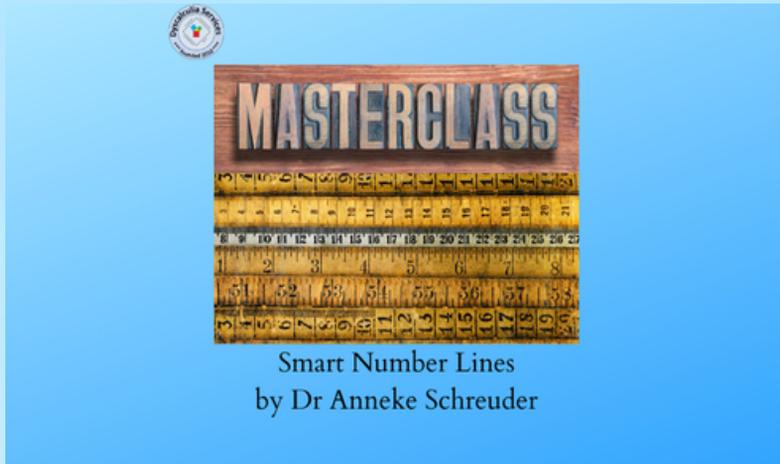

Keep the video series handy for when those situations come up and use it to feel more confident with your decisions.

Masterclass Number Lines

Math is our passion, awareness, communication, research
and remediation of dyscalculia is our mission

[Click Here](#)

In my work with children who have trouble with math I have used various methods and strategies to develop and enhance the mathematical thinking and, among many other useful manipulatives, one of the better ways to help them is by the consistent use of number lines. Moving slowly with them from the number path to the number lines, then to double number lines and eventually even to circular number lines and number lines on a grid to form graphs.

The number line can be the anchor we can tie other models to. I'll share the step-by-step progression of understanding mathematical concepts based on an increasingly sophisticated number line. We start from counting and take it to reasoning about the additive and multiplicative connections between quantities as basis for proportions, percentages, unit-conversion, and algebra. One overarching model helps students see the red thread in the relationship between operations and concepts.

Teacher Professional Development

Dr. Schreuder is available to support your Teacher's
Professional Development days.

From filling in a spot in your program to providing a full day
of workshops or lectures, Dr Schreuder can bring the
awareness, knowledge, and skill your teachers need to deal with
children who are bad at math or have the math learning
disability dyscalculia.

Options are available for both on-site and virtual training.

Math Homework Help

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Online Math Tutorials
elementary school level

MomsTeachMath.com

We know that there are many very dedicated parents around the country who are homeschooling their children for a variety of reasons. We also know that the Math portion of the regular Home school curriculum versions can be challenging.

So Dr. Schreuder has developed this resource to aid parents in their efforts. In her own clear way she explains what has worked in her practice of working with children who need help with Math. She is passionate about the topic and shows exactly what parents need to do and say to help their child mastering Math.

The Course/Resource offers:

35 Videos (and more added in the near future)

Over 4 hours of video

Over 150 downloadable pages with tips explanations and activities

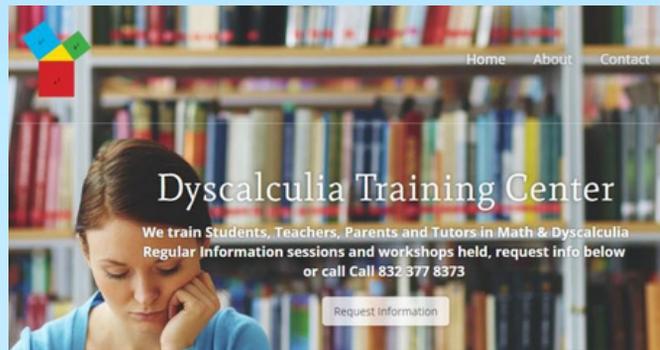

Direct email support for your specific questions

Dyscalculia Training Center

Math is our passion, awareness, communication, research
and remediation of dyscalculia is our mission

DyscalculiaTraining.org

The dyscalculia training center was formed to have one place for all to go to and browse through our catalog of various forms of training.

We train Parents, Teachers, and Tutors who work with children who have trouble with math or even the math learning disability dyscalculia.

Dyscalculia Testing

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Online Math and Dyscalculia
Screening Test

DyscalculiaTesting.com

The online Math and Dyscalculia Screener Test is a service to those who want to know if they could have a Math Learning Disability or Dyscalculia.

The complete online Math and Dyscalculia Screener Test has 15 parts, but no one will complete all 15 parts.

Depending on their age and grade one will complete a maximum of 14 or a minimum of 8 parts of the online Math and Dyscalculia Screener Test.

A report is emailed shortly after completing the test and gives a good indication about the math levels for relevant math operations and if signs of Dyscalculia are present.

For a full evaluation that could be used to request accommodations, we would need to do a much more comprehensive assessment. Contact us at drschreuder@dyscalculiaservices.com

Adult Dyscalculia

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Adult Dyscalculia

AdultDyscalculia.org

Adult Dyscalculia

Dyscalculia is still a learning disability that goes undetected in many cases. As this has been going on for many years, there are adults who have had math troubles their whole school life and now experience math troubles in the professional and social life.

With this in mind Dyscalculia Services created AdultDyscalculia.org, a place where adults who have trouble with math can go to find resources for an assessment or to get information about Adult Dyscalculia Tutoring.

Dyscalculia Toolkit

Math is our passion, awareness, communication, research
and remediation of dyscalculia is our mission

Dyscalculia Toolkit

DyscalculiaToolKit.org

The Dyscalculia Toolkit is a site with free downloadable resources to help you teach your children math.

Many parents and teachers want to help children who have trouble with math but sometimes lack the appropriate tools. The free tools on the site will help you get started.

More tools and demonstration videos can be found at our MomsTeachMath.com site where you can get access to the video series by Dr. Schreuder.

The Dyscalculia Toolkit will be filled from time to time with some fresh resources as they get developed.

Dyscalculia Webinars

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Free weekly webinars

Webinars.DyscalculiaServices.com

Dr. Schreuder, offers free webinars about Dyscalculia on a regular basis.

The current cycle includes the following topics:

- * Dyscalculia and Math Anxiety, an introduction
- * Dyscalculia in the Classroom
- * Dyscalculia: Effective use of Manipulatives
- * Dyscalculia: Golden Rules for Interventions
- * Dyscalculia; Early warning signs, screening and testing

The webinars are replayed weekly and offer a good first introduction in Dyscalculia.

Upon completing of a survey with questions, participants can receive a certificate of completion.

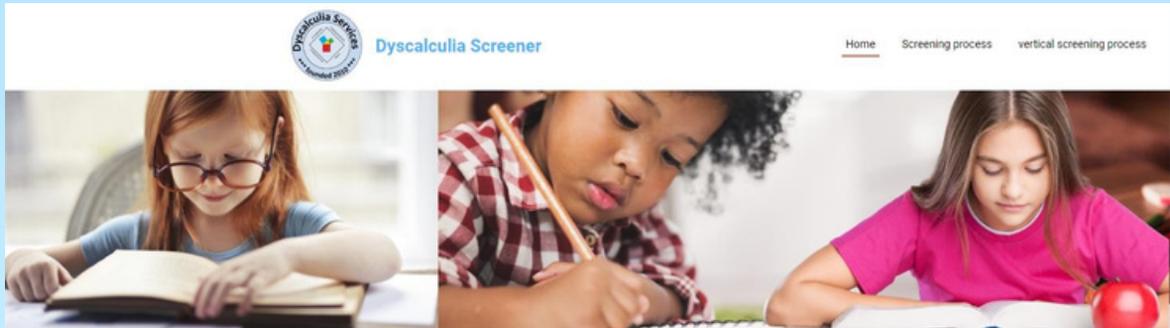

Dyscalculia Screeners

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Dyscalculia Screener

DyscalculiaScreener.org

Dyscalculia is still a learning disability that goes undetected in many cases. For this reason Dyscalculia Services has created DyscalculiaScreener.org, a place where parents, teachers and schools can go to find resources that will help them identify if Dyscalculia could play a role.

Detecting Dyscalculia is a four-step process and on DyscalculiaScreener.org we offer a quick checklist for dyscalculia, Dyscalculia screeners per grade, access to our online Math and Dyscalculia Screening Test and an explanation of our online face to face assessments that lead to a report with a diagnosis and recommendations for accommodations and remediation.

Math Assessment Reasoning & Strategy

Math is our passion, awareness, communication, research
and remediation of dyscalculia is our mission

MathStrategy.org

Math Assessment Reasoning & Strategy

The Math Assessment Reasoning and Strategy system (MARS for short) is an organized way to interview students and find out what reasoning capabilities and skills they have already developed and what strategies they use.

This assessment will help you develop an intervention plan to support the student in their further development in math.

You can use this system while sitting down with the student and use your phone or a tablet to enter the observations.

Dyscalculia Podcasts

Weekly new podcasts with Dr Schreuder

Most weeks Dr Schreuder will release a podcast where the topics from some of the items in the dyscalculia headlines will be discussed in slightly more details.

You can follow the podcasts from whatever app you use to get your podcasts or find them on Spotify.

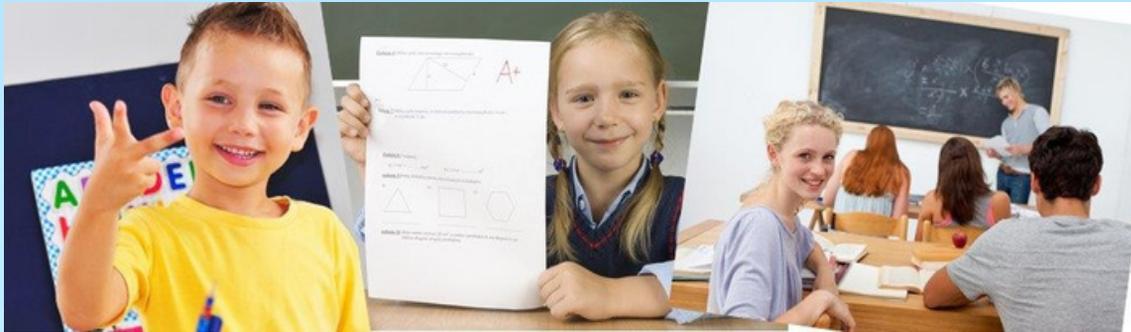

Dyscalculia Headlines

Math is our passion, awareness, communication, research and remediation of dyscalculia is our mission

Daily Dyscalculia News

DyscalculiaHeadlines.com

As Dyscalculia is not that well known yet, it can be hard to find useful information about it.

To ensure interested people will be able to find the information they need we post most workdays one item related to Dyscalculia.

The value of our Dyscalculia Headlines site is in the categories that are given to each topic and the links to original content.

By clicking the category links people get access to information built up over a range of years.

Via social media, past links are shared continuously in an effort to enhance the awareness of Dyscalculia.

We are proud that thousands of people visit the site every week and find value in the information offered.
